Application No.: 10/823328 Case No.: 58077US003

## **Amendments to the Claims:**

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims

We claim:

1. (Currently Amended) A transdermal drug delivery device for delivering a pharmaceutically active agent comprising:

a) a reservoir comprising a therapeutically effective amount of a pharmaceutically active agent;

b) a substantially continuous, translucent inorganic barrier layer adjacent to at least a portion of the reservoir, wherein the inorganic barrier layer comprises a material selected from the group consisting of indium tin oxide, aluminum oxide, silicon oxide, aluminum-silicon-oxide, aluminum-silicon-oxy-nitride, and wherein the inorganic barrier layer is greater than 10 nm and less than 100 nm thick; and

c) a backing film substrate, the inorganic barrier layer directly adjoining the backing film substrate;

wherein the device is translucent.

8. (Withdrawn)
9. (Withdrawn)
10. (Original) A transdermal drug delivery device for delivering a pharmaceutically active agen according to claim 1, wherein the inorganic barrier layer directly adjoins the reservoir.
11. (Cancelled)
12. (Canceled)
13. (Original) A transdermal drug delivery device for delivering a pharmaceutically active agen according to claim 1, comprising a plurality of inorganic barrier layers.
14. (Original) A transdermal drug delivery device for delivering a pharmaceutically active agen according to claim 1, wherein the reservoir comprises a pressure-sensitive adhesive.
